

Patty Hanks Shelton School of Nursing

Important Clinical Documents

I. Health Form

You will need to complete the Health Form and have all necessary immunizations, physical, etc. Your TB test will need to be renewed every year. You must have the Health Form completed before prior to entering nursing school. **This is requirement to entering nursing school, and there are no exceptions.**

*A student who makes a disclosure of a disability has the legal responsibility to request any special accommodations of the disabling condition. Completion of the required documentation is necessary in order for PHSSN to determine reasonable accommodation of needs.

II. Proof of Medical Insurance/CPR Certification

You will need to provide a photocopy of medical health insurance (hospitalization). If you do not have any, you need to purchase it before the fall term begins. **This is a requirement to enter nursing school and in the clinical setting, and there are no exceptions.**

You must submit a photocopy of your current CPR certification. If you are planning to take CPR this summer, please be sure to document this. Once you have received certification, it is your responsibility to provide PHSSN a copy of the card. **Your CPR must be the American Heart Association Health Care Provider CPR.**

In addition, a copy of your driver's license and social security card must be submitted.
